

Return & Refund Policy

Product: PrimusTrader — Self-Hosted Algorithmic Trading Bot

Seller: PrimusTrader

Contact: kurtis@primustrader.com

Last updated: June 5, 2026

PrimusTrader is a digital product delivered instantly as software plus a license key. Please read this policy carefully before purchasing.

1. Nature of the product

Because PrimusTrader is a downloadable digital product and a license key is delivered immediately upon purchase, it is generally **non-returnable** once the product files have been downloaded and/or the license key has been issued. We cannot "un-deliver" software or revoke knowledge of a key.

2. Refund eligibility

We want you to be satisfied. We will consider a refund if **all** of the following apply:

- You request it within **14 days** of purchase, AND
- The Software fails to install or run due to a defect we cannot resolve with reasonable support, AND
- You provide a description of the issue and the steps you have tried.

We may decline refund requests where the product works as described, or where the request is based on:

- Trading losses or strategy performance (the Software is an automation tool, not a guarantee of profit — see the disclaimer below).
- Failure to meet the stated system requirements (Windows PC, a broker account with API access).
- Buyer's change of mind after download, where permitted by law.

3. How to request a refund

Email kurtis@primustrader.com from the address used to purchase, include your Whop order ID, and describe the problem. We will respond within **3–5 business days** and work with you to resolve the issue first; if we cannot, we will process an eligible refund through Whop.

4. Statutory rights

Nothing in this policy limits any non-waivable rights you may have under the consumer-protection laws of your country or region. Where the law grants you a stronger refund right than this policy, that law applies.

5. Important disclaimer

PrimusTrader is a trading-automation tool, **not financial advice and not a guarantee of profit**. Trading carries risk, including loss of capital. Refunds are not available for trading losses or dissatisfaction with market results. Always test in paper-trading mode before trading live.
