

Terms of Service

Product: PrimusTrader — Self-Hosted Algorithmic Trading Bot

Seller: Primustrader ("we", "us", "our")

Contact: kurtis@primustrader.com

Last updated: June 5, 2026

By purchasing, downloading, installing, or using PrimusTrader (the "Software"), you ("you", "the user") agree to these Terms of Service. If you do not agree, do not purchase or use the Software.

1. What you are buying

PrimusTrader is software you install and run on your own computer. You are purchasing a personal license to use the Software, not a financial service, brokerage, investment advisory, or money-management service. We do not execute trades on your behalf, hold your funds, or access your brokerage accounts. All trading is performed locally on your machine, through broker connections you configure with your own API credentials.

2. License

Your purchase grants you a non-exclusive, non-transferable license to install and use the Software for your personal or internal business use, tied to the license key delivered to you. You may not resell, sublicense, redistribute, publish, or share the Software or your license key. See the End User License Agreement (EULA) for full license terms, which are incorporated here by reference.

3. Not financial advice

The Software, its strategies, parameters, signals, and any AI-generated explanations are provided for informational and automation purposes only. They do **not** constitute financial, investment, tax, or legal advice, and are not a recommendation to buy or sell any security or asset. You are solely responsible for all trading decisions and their outcomes.

4. Trading risk

Algorithmic and automated trading involves substantial risk, including the **total loss of capital**. Markets are volatile and unpredictable. Past performance and backtests do not guarantee future results. You accept full responsibility for any losses. We strongly recommend testing every configuration in **paper-trading mode** before trading with real funds.

5. Your responsibilities

You are responsible for:

- Obtaining and securing your own broker accounts and API keys.
- Complying with the terms, rules, and rate limits of your brokers and any exchanges you connect.
- Complying with all laws and regulations that apply to you, including tax and securities laws in your jurisdiction.
- Configuring risk limits, monitoring the Software, and intervening (including using the kill switch) as needed.
- Keeping your computer, license key, and credentials secure.

6. Third-party services

The Software connects to third-party services you choose (e.g., Alpaca, Tradier, Binance, and optionally the Claude API). We do not control these services, are not responsible for their availability, accuracy, fees, or actions, and are not affiliated with or endorsed by them. Your use of those services is governed by their own terms.

7. No warranty

The Software is provided "AS IS" and "AS AVAILABLE", without warranties of any kind, express or implied, including merchantability, fitness for a particular purpose, accuracy, profitability, or non-infringement. We do not warrant that the Software will be error-free, uninterrupted, profitable, or that any strategy will perform in any particular way.

8. Limitation of liability

To the maximum extent permitted by law, we are not liable for any trading losses, lost profits, or any indirect, incidental, special, consequential, or punitive damages arising from your use of (or inability to use) the Software. Our total aggregate liability for any claim is limited to the amount you paid for the Software.

9. Updates and changes

We may release updates to the Software and may update these Terms from time to time. Continued use after an update constitutes acceptance of the revised Terms.

10. Termination

We may suspend or terminate your license if you breach these Terms or the EULA (for example, by sharing or reselling your license key). On termination you must stop using the Software.
